

ALTER-NET SUMMER SCHOOL

ALTER-Net

PEYRESQ, FRANCE

With the French Alps as a backdrop, the ALTER-Net Summer School provides a singular setting for engaging with the sustainability challenges facing society today.

PEYRESQ

BIODIVERSITY, SUSTAINABILITY, ECOSYSTEM SERVICES?

Summer School tutors encourage critical thinking and deconstruction of new concepts, facilitating lively debates on current issues in biodiversity and ecosystem research. Excursions into the rustic countryside of Provence bring the concepts at hand to vivid life.

In addition to teaching state-of-the-art research, the Summer School represents a prime opportunity for making professional contacts, exploring career options, and forming friendships with diverse colleagues.

**“A modern-day School of Aristotle,
where lecturers learn as much as
students - if not more”**

- Martin Sharman
