

# ALTER-Net: Europe's ecosystem research network

ALTER-Net is a thriving Europe-wide, self supporting network of public and private research and outreach organizations, aiming to integrate and improve European biodiversity research.

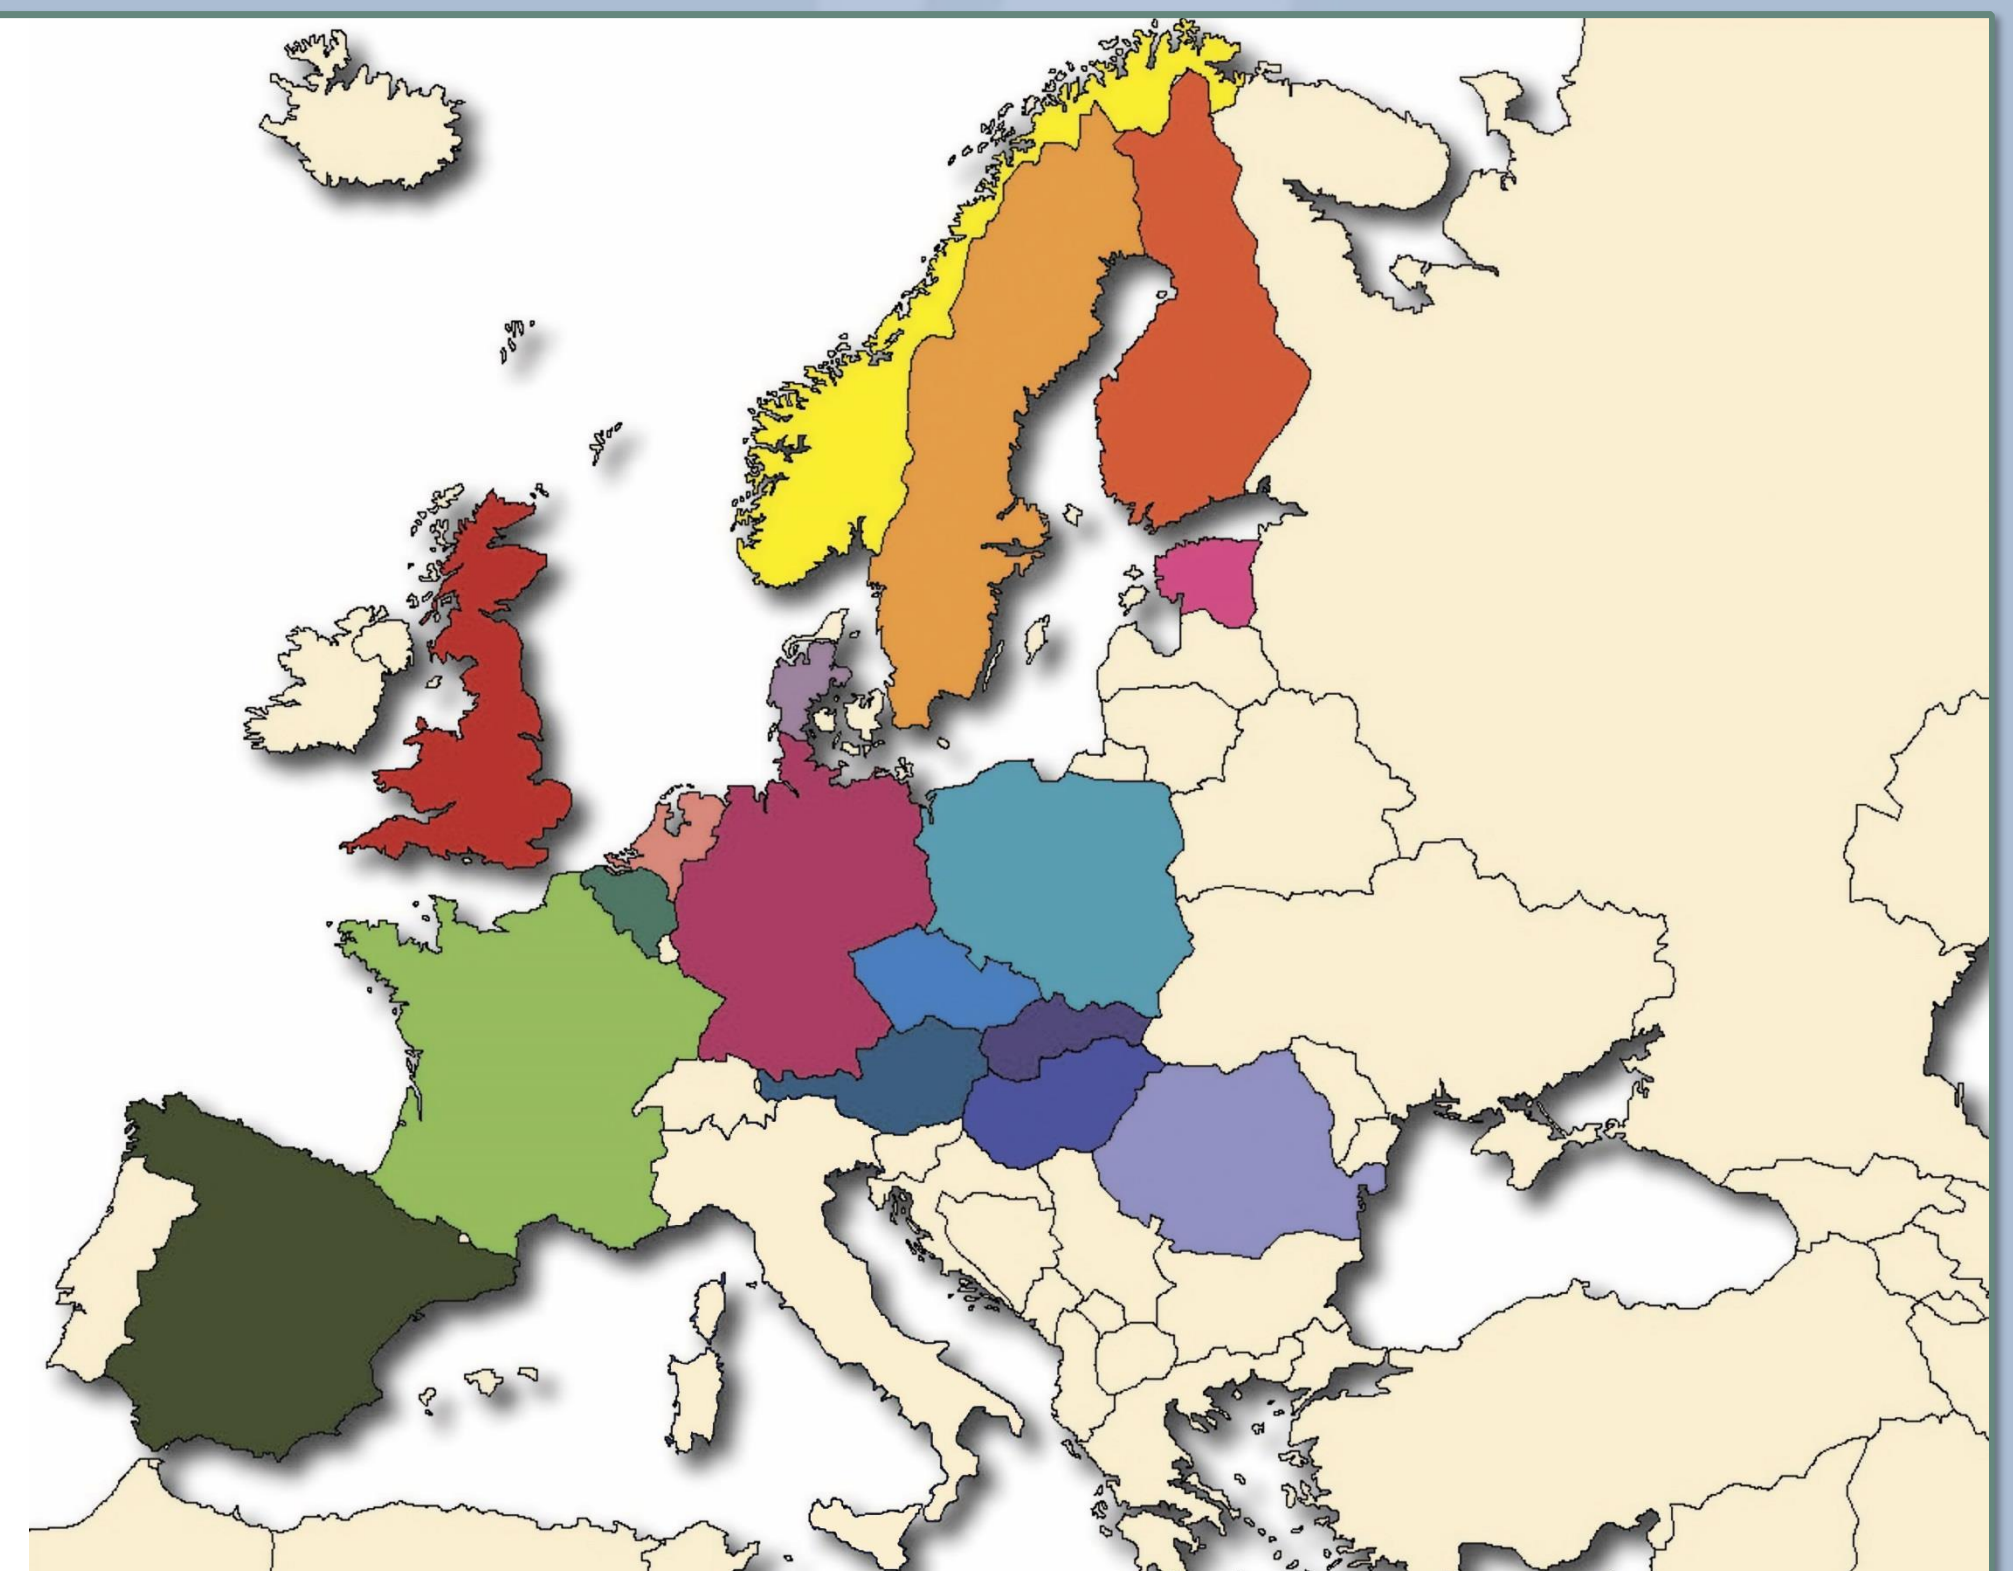

ALTER-Net supports European and global decision-making on biodiversity and ecosystem services by enhancing the provision, communication and uptake of new knowledge. This knowledge results from long-term transdisciplinary, interdisciplinary and disciplinary research carried out by ALTER-Net partners.

## ALTER-Net's main activity areas

- Research Activities
- Research Calls: encouraging member collaboration
- High Impact Actions
- Joint Training Activities: including the annual ALTER-Net Summer School
- Operating at the Science-Policy Interface
- Supporting Research Infrastructures
- Communication

## Partners
